

MODERN HUMAN ORIGINS

Lecture: Wednesdays, 16-18:00 c.t.

Institut für Naturwissenschaftliche Archäologie, Rümelinstraße 23, Room 602

INSTRUCTORS

Dr. Christian Bentz (linguistics), christian.bentz@uni-tuebingen.de

Dr. Hugo Reyes-Centeno (paleoanthropology), hugo.reyes-centeno@uni-tuebingen.de

Dr. Yonatan Sahle (archaeology), yonatan.sahle@uni-tuebingen.de

COURSE DESCRIPTION

This course introduces the evolutionary study of the modern human lineage, with a review of the biological, cultural, and linguistic diversity of human populations over the last million years. It commences with an introduction to key concepts in evolutionary theory and their application to the study of humans. The course provides a survey of the fossil and archaeological records of the genus *Homo* and the speciation or divergence of human populations, including the emergence of human populations that anatomically resemble people living today and their associated cultural assemblages and behavioral repertoires. Likewise, the instructors will provide a historical overview of how advances in evolutionary theory, including the modern synthesis of the mid-twentieth century, have shaped our understanding of human evolution. In doing so, they set the stage for critically examining the origins of anatomical and behavioral modernity, as well as the co-evolution of biology and culture in human populations. The course is then divided into sections corresponding to the instructor's specializations in archaeology, paleoanthropology, and linguistics, providing a more comprehensive overview of how each discipline informs the emergence of biocultural modernity. Students enrolled in Winter Semester 2017-18 will attend the third annual, international symposium of the DFG Center for Advanced Studies "Modern human origins and dispersal." The course will be of interest to undergraduate students in archaeology, linguistics, paleoanthropology, prehistory, and evolutionary biology.

Students in linguistics (Faculty of Philosophy) can use this for one of the following modules: (1) BA Linguistics: Variation, Evolution & Change; (2) MA Linguistics: Language, Variation & Change; (3) MA Linguistics: Research Trends 1.

COURSE GRADE

Written exam: mix of multiple-choice, short-answer, and essay (90 minutes)

COURSE OUTLINE

- Oct 25 Anatomical and behavioral modernity** (Bentz, Reyes-Centeno, and Sahle):
- Evolutionary theory; history and philosophy of the science of human evolution
 - The modernity paradigm; gradual and punctuated change across time and space
 - Current debates in the study of modern human origins
- Nov 3-4 DFG Center symposium “Modern human origins and dispersal”**
(Lectures in Alte Aula, Münzgasse 30. Schedule: www.wordsandbones.uni-tuebingen.de/symposium2017)
- Nov 8 Archaeology at the dawn of modern humans** (Sahle)
- Overview of the Early-Middle Pleistocene archaeological record
 - The African Middle Stone Age
 - The Middle Paleolithic of Eurasia
- (Richter 2011; Wadley 2013; Toth and Schick 2015)*
- Nov 15 The archaeology of modern humans** (Sahle)
- Complex technologies and behaviors: revolution or evolution?
 - The Middle-Late Pleistocene archaeology of Africa
 - The Middle to Upper Paleolithic transition in Eurasia
- (McBrearty and Brooks 2000; Roebroeks 2008; Conard 2010; Wadley 2013)*
- Nov 22 The Out-of-Africa dispersal: An archaeological perspective** (Sahle)
- Current views and appraisal of the archaeological evidence in hand
 - The role of technology and behavior: Is modern as modern does, or looks?
 - What archaeological evidence: future directions?
- (Conard 2010; Shea 2011; Groucutt et al. 2015)*
- Nov 29 The Middle-Late Pleistocene fossil record of Africa and Eurasia** (Reyes-Centeno)
- Chronology and stratigraphy of key fossil discoveries
 - Classification, nomenclature, and taxonomy of fossils
 - Anatomically modern humans and their contemporaries
- (White et al. 2003; Bräuer 2015)*
- Dec 6 Genomics of modern human origins and dispersals** (Reyes-Centeno)
- Genetics and genomics of recent human populations
 - Ancient DNA and fossil calibration methods for dating key events in human evolution
 - Inferences on human dispersals
- (Cavalli-Sforza and Feldman 2003; Reyes-Centeno 2016; Nielsen et al. 2017)*
- Dec 13 Bio-cultural co-evolution and adaptations** (Reyes-Centeno)
- Evolution by neutral and adaptive forces, modes of transmission
 - Theoretical frameworks in the study of co-evolution
 - Recent and prospective evolution in human populations

(Laland et al. 2010; Renfrew 2010; Creanza and Feldman 2016)

Dec 18–Jan 7 Winter Break (no lectures)

Jan 10 **Adaptive and Non-adaptive Theories of Language Evolution** (Bentz)

- saltational vs. gradualist accounts
- language and brain co-evolution

(Christiansen and Kirby 2003; Pinker and Jackendoff 2005; Fitch 2010, p. 73-143)

Jan 17 **Preadaptations to Language** (Bentz)

- The evolution of the vocal tract
- Brain areas relevant for language processing
- Genetic underpinnings of language

(Christiansen and Chater 2008; Fitch 2010, p. 297-364; Klein 2017)

Jan 24 **Interfaces with Archaeology and Genetics** (Bentz)

- stone tool production and language
- reconstructing the human past with linguistic and archaeological evidence
- genetic and linguistic diversity

(Creanza et al. 2015; Morgan et al. 2015; Moisik and Dediu 2017)

Jan 31 Review and discussion

Feb 7 Exam
