Lecture 18: Speech Acts

11/07/2023, Christian Bentz

Mock Exam

- ▶ Will be held next **Thursday 13th July (12:15-13:45)** in the current lecture room.
- ▶ You do not have to attend (just as for any other lecture).
- ▶ It is not marked.
- ▶ Solutions will be discussed in the tutorials the following week.

Section 1: Recap of Lecture 17

Historical Background

“[...] There is more literature on presupposition than on almost any other topic in pragmatics. [...] The volume of work is in part accounted for by a **long tradition of philosophical interest** [...] In addition presupposition was a **focal area in linguistic theory during the period 1969-76**, because it raised substantial problems for almost all kinds of (generative) linguistic theories [...]”

Levinson (1983), p. 167.

Informal Definition

“As a first approximation, let us define **presupposition as information** which is **linguistically encoded** as being part of the **common ground** at the time of utterance [...] Speakers can choose to indicate, by the use of certain words or grammatical constructions, that a certain piece of information is part of the common ground.”

Kroeger (2019), p. 40.

- (1) A: Kepler died in misery.
B: I don't know who you are talking about.

Note: If we see Bs comment as a rejection of the presupposition “Kepler refers to something”, then this is an instance of *presupposition failure* (“Kepler does not exist” would be the clearest case of rejection). If we see this rather as a request for clarification who Kepler is, then it would be *accommodation*.

Formal Definition

“A statement A presupposes a statement B iff:

- (i) if A is true, then B is true,
- (ii) if A is false, then B is [still] true.”

Levinson (1983), p. 175, citing Strawson (1952).

- (3) Statement A: Kepler died in misery.
PRESUPPOSITION B: The name ‘Kepler’ denotes an individual.
- (4) Statement $\neg A$: Kepler did *not* die in misery.
PRESUPPOSITION B: The name ‘Kepler’ denotes an individual.

Presupposition Triggers

Over the years, a large number of **presupposition triggers** have been identified (for English). These include but are not limited to:

- (a) Definite descriptions:
 - ▶ definite noun phrases
 - ▶ possessive phrases
 - ▶ restrictive relative clauses
- (b) Factive predicates
- (c) Implicative predicates
- (d) Aspectual predicates
- (e) Temporal clauses
- (f) Counterfactuals
- (g) Comparisons
- (h) (Scalar terms)

Kroeger (2019), p. 43.

Entailment, Presupposition, and Implicature

Given that we have established the difference between linguistic and non-linguistic inferences, **presupposition** is one of several possible **linguistic inferences**. The others we have discussed are **entailment** and **implicature**.

Tests: Presuppositions

The tests relevant to distinguish **entailments** and **conversational implicatures** from **presuppositions** are mainly the *Negation* and the *Question Test*.

Kroeger (2019), p. 152.

	Entailment	Conversational Implicature	Presupposition
a. Cancellable	NO	YES	sometimes ¹
b. Suspendable	NO	YES	sometimes
c. Reinforceable	NO	YES	NO
d. Negation	NO	NO	YES
e. Question	NO	NO	YES

¹According to Kroeger (2019), p. 152, some presuppositions seem to be cancellable, “but only if the clause containing the trigger is negated. Presuppositions triggered by positive statements are generally not cancellable.”

Example Utterances

Assume we have the three example utterances and respective inferences below. We will run through the different tests to establish whether these **inferences** are **entailments**, **conversational implicatures**, or **presuppositions**.

- (5) John killed the wasp.
INFERENCE: The wasp died.
- (6) A: I ran out of petrol.
B: There is a garage around the corner.
INFERENCE: One can buy petrol there.
- (7) John regrets that he lied.
INFERENCE: John lied.

reinforceable: NO
preserved under negation: NO
preserved in question: NO

→ **entailment**

(9) A: I ran out of petrol.
B: There is a garage around the corner.
INFERENCE: One can buy petrol there.

cancellable: YES
suspendable: YES
reinforceable: YES
preserved under negation: NO
preserved in question: NO

→ **conversational implicature**

(10) John regrets that he lied.
INFERENCE: John lied.

–

cancellable: NO
suspendable: NO?
reinforceable: NO
preserved under negation: YES
preserved in question: YES

→ **presupposition**

Accommodation

It is a **common misunderstanding** about presuppositions that they *have to be* part of the common ground. This is not necessarily true. If it turns out that the presupposition is not actually part of the common ground, then hearers often **accommodate** in the sense of accepting the presupposition as true, or they might ask for confirmation to “officially” establish the presupposition as common ground.

Section 1: Recap
of Lecture 17

Section 2:
Historical
Background

Section 3:
Performatives

Section 4:
Speech Acts

Section 5: Direct
and Indirect
Speech Acts

Summary

References

- (11) A: My cat got stuck on the roof last night.
PRESUPPOSITION: The speaker has a cat.
- (12) B (who doesn't know that A has a cat): Oh, I'm sorry to hear that. / Oh, you have a cat?

Presupposition Failure

Genuine **presupposition failure** only occurs when the hearer downright **rejects** the presupposition.

Section 1: Recap
of Lecture 17

Historical
Background

Section 3:
Performatives

Section 4:
Speech Acts

Section 5: Direct
and Indirect
Speech Acts

Summary

References

(13) A: Take some more tea.

PRESUPPOSITION: The hearer had some tea already.

B: I actually haven't had any tea yet.

(14) A: Are you a good witch or a bad witch?

PRESUPPOSITION: The hearer is some kind of witch.²

B: Who, me? I'm not a witch at all. I'm Dorothy Gale, from Kansas.

Kroeger (2019), p. 44, citing from the movie *The Wizard of Oz*.

²This is yet another kind of presupposition which we haven't discussed above. Also, it is a problematic one, as it doesn't preserve under negation: *You are not a good witch or a bad witch*.

Speech Act Theory

Section 2: Historical Background

Historical Overview

“It was for too long the assumption of philosophers that the business of a ‘statement’ can only be to ‘describe’ some state of affairs, or to ‘state some fact’, which it must do either truly or falsely. Grammarians, indeed, have regularly pointed out that not all ‘sentences’ are (used in making) statements: there are, traditionally, besides (grammarians’) statements, also questions and exclamations, and sentences expressing commands or wishes or concessions.”

Austin (1962), p. 1.

Tractatus Logico-Philosophicus

	German	Ogden	Pears/McGuinness
1*	Die Welt ist alles, was der Fall ist.	The world is everything that is the case.	The world is all that is the case.
1.1	Die Welt ist die Gesamtheit der Tatsachen, nicht der Dinge.	The world is the totality of facts, not of things.	The world is the totality of facts, not of things.
1.11	Die Welt ist durch die Tatsachen bestimmt und dadurch, dass es alle Tatsachen sind.	The world is determined by the facts, and by these being <i>all</i> the facts.	The world is determined by the facts, and by their being <i>all</i> the facts.
1.12	Denn, die Gesamtheit der Tatsachen bestimmt, was der Fall ist und auch, was alles nicht der Fall ist.	For the totality of facts determines both what is the case, and also all that is not the case.	For the totality of facts determines what is the case, and also whatever is not the case.
1.13	Die Tatsachen im logischen Raum sind die Welt.	The facts in logical space are the world.	The facts in logical space are the world.
1.2	Die Welt zerfällt in Tatsachen.	The world divides into facts.	The world divides into facts.
1.21	Eines kann der Fall sein oder nicht der Fall sein und alles übrige gleich bleiben.	Any one can either be the case or not be the case, and everything else remain the same.	Each item can be the case or not the case while everything else remains the same.
2	Was der Fall ist, die Tatsache, ist das Bestehen von Sachverhalten.	What is the case, the fact, is the existence of atomic facts.	What is the case—a fact—is the existence of states of affairs.
2.01	Der Sachverhalt ist eine Verbindung von Gegenständen. (Sachen, Dingen.)	An atomic fact is a combination of objects (entities, things).	A state of affairs (a state of things) is a combination of objects (things).
2.011	Es ist dem Ding wesentlich, der Bestandteil eines Sachverhaltes sein zu können.	It is essential to a thing that it can be a constituent part of an atomic fact.	It is essential to things that they should be possible constituents of states of affairs.
2.012	In der Logik ist nichts zufällig: Wenn das Ding im Sachverhalt vorkommen kann, so muss die Möglichkeit des Sachverhaltes im Ding bereits präjudiziert sein.	In logic nothing is accidental: if a thing <i>can</i> occur in an atomic fact the possibility of that atomic fact must already be pre-judged in the thing.	In logic nothing is accidental: if a thing <i>can</i> occur in a state of affairs, the possibility of the state of affairs must be written into the thing itself.
2.0121	Es erschiene gleichsam als Zufall, wenn dem Ding, das allein für sich bestehen	It would, so to speak, appear as an accident, when to a thing that could exist alone	It would seem to be a sort of accident, if it turned out that a situation would fit a

* [German] Die Decimalzahlen als Nummern der einzelnen Sätze deuten das logische Gewicht der Sätze an, den Nachdruck, der auf ihnen in meiner Darstellung liegt. Die Sätze *n.1, n.2, n.3, etc.*, sind Bemerkungen zum Satze No. *n*; die Sätze *n.m1, n.m2, etc.* Bemerkungen zum Satze No. *n.m*; und so weiter. / [Ogden] The decimal figures as numbers of the separate propositions indicate the logical importance of the propositions, the emphasis laid upon them in my exposition. The propositions *n.1, n.2, n.3, etc.*, are comments on proposition No. *n*; the propositions *n.m1, n.m2, etc.*, are comments on the proposition No. *n.m*; and so on. / [Pears & McGuinness] The decimal numbers assigned to the individual propositions indicate the logical importance of the propositions, the stress laid on them in my exposition. The propositions *n.1, n.2, n.3, etc.* are comments on proposition no. *n*; the propositions *n.m1, n.m2, etc.* are comments on proposition no. *n.m*; and so on.

Philosophical Investigations

27. *“We name things and then we can talk about them: can refer to them in talk.” – As if what we did next were given with the mere act of naming. As if there were only one thing called “talking about a thing”. Whereas in fact we do the most various things with our sentences. Think of exclamations alone, with their completely different functions.*

Water!

Away!

Ow!

Help!

Fine!

No!

Are you inclined still to call these words “names of objects”?

Historical Background

“There are strong parallels between the later Wittgenstein’s emphasis on language usage and language-games and Austin’s insistence that “the **total speech act in the total speech situation** is the only actual phenomenon which, in the last resort, we are engaged in elucidating” (1962: 147).”

Section 3:
Performatives

Section 4:
Speech Acts

Section 5: Direct
and Indirect
Speech Acts

Summary

References

“Where is the coin?”

“In the red box.”

Note: We can translate the declarative sentence *The coin is in the red box* into standard predicate logic, and evaluate its truth based on the model world we define. But how about the question *Where is the coin?*, and how about an imperative: *Give me the coin!*

Performatives

Even if we stay in the domain of *declarative sentences*, there are certain sentences for which we cannot straightforwardly assign a truth value. They are not just used to *say* something about the world, but to actually *do* something, i.e. actively change the world. This type of declaratives is called **performatives** by Austin (1962).

Section 1: Recap of Lecture 17

Performatives: Examples

Austin's own examples:

- (15) 'I do (take this woman to be my lawful wedded wife)' – as uttered in the course of the marriage ceremony.
- (16) 'I name this ship the *Queen Elizabeth*' – as uttered when smashing the bottle against the stem.
- (17) 'I give and bequeath my watch to my brother' – as occurring in a will.
- (18) 'I bet you sixpence it will rain tomorrow.'

Austin (1962), p. 5.

Further examples:

- (19) I hereby sentence you to 10 years in prison.
- (20) I now pronounce you man and wife.
- (21) I declare this meeting adjourned.

Kroeger (2019), p. 181.

Discussion Point

Remember that the *Challenge Test* is sometimes used to understand the proposition expressed by a sentence. Take the following declarative sentences and the challenging of their truth:

- (22) A: The African elephant is the biggest mammal on 21st century Earth.
B: – No. It is not.
- (23) A: I declare this meeting closed.
B: – No, you don't.

Arguably both sentences can be challenged. What is the difference though?

Properties of Performatives

There is a list of features which distinguish **performatives** from “normal” **declarative sentences** (i.e. constatives):³

- ▶ *Indicative mood* and *present tense* (with a non-habitual interpretation).⁴
- ▶ Usage of a *performative verb* (e.g. *sentence, declare, confer, invite, request, order, accuse*, etc.)
- ▶ Normally performatives occur with *active voice* of a *first person subject*.⁵
- ▶ Optional usage of the performative adverb *hereby*.

³There is a further distinction between *explicit* and *implicit* performatives, which we won't discuss here.

⁴In English, indicative mood and simple present tense typically yield a *habitual* interpretation, e.g. *I play tennis* normally means *I play tennis regularly/habitually*.

⁵Passive voice with second or third person subjects is also possible, e.g. *Passengers are requested to not talk to the driver*.

Felicity Conditions

“[...] it does not make sense to try to describe truth conditions for performatives. Instead, Austin says, we need to identify the conditions under which the performative speech act will be **felicitous**, i.e. successful, valid, and appropriate. He identifies the following kinds of **Felicity Conditions**:”

Kroeger (2019), p. 182, citing Austin (1962: 14-15).

- (A.1) Conventionality Condition
- (A.2) Appropriateness Condition
- (B.1) Correctness Condition
- (B.2) Completeness Condition
- (C.1) Sincerity Condition
- (C.2) Subsequent Conduct Condition

Performatives

Section 4:
Speech Acts

Section 5: Direct
and Indirect
Speech Acts

Summary

References

(24) I now pronounce you man and wife.

(25) I lend you this book.

Conventionality:

There has to be a conventionalized procedure to get married.

There is a conventionalized sense of “to lend sb. sth.”

Appropriateness:

The person uttering this sentence has to be licensed to perform such a ceremony.

The person uttering this sentence has to own the book to lend it.

Correctness and Completeness Conditions

“(B.1) The procedure must be executed by all participants both correctly and

(B.2) completely.”

Kroeger (2019), p. 182, citing Austin (1962: 14-15).

Background

Section 3:
Performatives

Section 4:
Speech Acts

Section 5: Direct
and Indirect
Speech Acts

Summary

References

(26) I now pronounce you man and wife.

Correctness:

In this particular case, the exact wording has to be correct. The other steps of the ceremony have to be correct (e.g. exchange of rings).

Completeness:

The verbal procedure has to be complete. The other procedures linked to the verbal procedures have to be complete.

Sincerity and Subsequent Conduct Conditions

“(C.1) Where, as often, the procedure is designed for use by persons having certain thoughts or feelings, or for the inauguration of certain consequential conduct on the part of any participant, then a person participating in and so invoking the procedure must in fact have those thoughts or feelings, and the participants must intend so to conduct themselves, and further

(C.2) must actually so conduct themselves subsequently.”

Kroeger (2019), p. 182, citing Austin (1962: 14-15).

(27) I do (take this woman to be my lawful wedded wife).

(28) I promise to return this book by Sunday.

Sincerity:

The speaker actually intends to do so.

Subsequent Conduct:

The speaker should then subsequently conduct in this way.

Violations of Conditions

There are two types of violations to these conditions:

- ▶ **Misfire:** In case the conditions under A-B are violated, this counts as a “misfire”, i.e. an attempt to formulate a performative, which is, however, not valid.
- ▶ **Abuse:** In case the conditions under C are violated, we talk about an “abuse”. The performative act is successful, but it is not sincere, and not followed by subsequent conduct. In a sense, the performative is void.

Discussion Point

Which felicity conditions were violated here? And through which type of violation?

CNN US Crime + Justice Energy + Environment Extreme Weather Space + Science

A pastor baptized people for decades using one wrong word. Now those are all considered invalid

By Chuck Johnston and Steve Almasy, CNN
Updated 1705 GMT (0105 HKT) February 15, 2022

(CNN) — A [Catholic](#) priest has resigned after a church investigation found he performed invalid baptisms throughout most of his more than 20-year career, according to Bishop Thomas Olmsted of the Diocese of Phoenix.

Father Andres Arango, who performed thousands of baptisms, would say, "We baptize you in the name of the Father, and of the Son, and of the Holy Spirit." But Olmsted explained the words "We baptize" should have been "I baptize" instead.

"The issue with using 'We' is that it is not the community that baptizes a person, rather, it is Christ, and Him alone, who presides at all of the sacraments, and so it is Christ Jesus who baptizes," [Olmsted wrote](#) in a message to parishioners posted last month.

The error also means that because baptism is the first of the sacraments, some people will need to repeat other sacraments, according to the [diocese webpage for frequently asked questions](#). CNN has reached out to the diocese for comment on other sacraments.

Are all Sentences Performatives?

It turns out that all (or most) sentences can be **paraphrased as performatives**. Does this mean that the term *performative* is void? According to Kroeger, understanding performatives and speech acts is still important, since the meaning of a sentence is more than just the proposition it carries.

References

Note: This distinction between *types of sentences* and *types of illocutionary forces/ speech acts* is mostly not strictly adhered to. This is apparent also in Kroeger (2019), p. 181: “Austin called this special class of declarative sentences performatives. He argued that we need to recognize performatives as a new class of speech acts [...] in addition to the commonly recognized speech acts such as statements, questions, and commands.”

Forces of Utterances

“Besides the question that has been very much studied in the past as to what a certain utterance means, there is a further question distinct from this as to what was the **force**, as we call it, of the utterance. [...] What we need [...] is a new doctrine about all the possible forces of utterances [...]”

Levinson (1983), p. 236, citing Austin (1970a), p. 251.

“So it is now claimed that all utterances, in addition to meaning whatever they mean, perform **specific actions** (or ‘do things’) through **having specific forces** [...].”

Levinson (1983), p. 236.

Three Parts of Speech Acts

According to Austin, there are three major subparts when performing a speech act:

1. **Locutionary Act:** The act of performing an utterance (phonetically and grammatically).
2. **Illocutionary Act:** The act of performing a *statement*, *question*, *command*, etc. by means of its conventional *force* (i.e. what is the locutionary act used for?)
3. **Perlocutionary Act:** The act of effecting the audience in a particular way.

Note: The Latin word *locutio* can mean “speech, speaking, phrase, pronunciation” (<https://en.pons.com/translate/latin-german/locutio>).

Locutionary Act

“[...] to say something is in the full normal sense to do something – which includes the utterance of certain noises, the utterance of certain words in a certain construction, and the utterance of them with a certain ‘meaning’ in the favorite philosophical sense of that word, i.e. with a certain sense and a certain reference. [...]”

Austin (1962), p. 94.

1. **Phonetic act:** Uttering certain “noises”, i.e. *speech sounds* using the speech apparatus.
2. **Phatic act:** Uttering of certain *words*, i.e. strings of speech sounds belonging to a certain vocabulary, and conforming to a certain grammar.
3. **Rhetic act:** Uttering the respective words with a certain “more-or-less” definite *sense and reference*.

Illocutionary Act

“To perform a locutionary act is in general, we may say, also and *eo ipso*⁶ to perform an **illocutionary act**, as I propose to call it. To determine what illocutionary act is so performed we must determine in what way we are using the locution [...]”

Austin (1962), p. 98.

- ▶ asking or answering questions
- ▶ assurance or warning
- ▶ announcing a verdict or an intention
- ▶ pronouncing a sentence
- ▶ etc.

⁶Translates into English as “of and by itself”. Note that this is likely true for humans in most situations of language usage, though not necessarily for animals. Some animals might learn to repeat strings of sounds uttered by humans, but they do not necessarily perform an illocutionary act by performing the locutionary act.

Perlocutionary Act

“Saying something will often, or even normally, produce certain **consequential effects** upon the feelings, thoughts, or actions of the audience, or of the speaker, or of other persons: and it may be done with the *design, intention, or purpose* of producing them [...]”

“It will be seen that the consequential effects of perlocutions are really consequences, which do not include such *conventional effects* as, for example, the speaker’s being committed by his promise (which comes into the illocutionary act).”

Austin (1962), p. 101-103.

Example

(31) A to B: You can't do that.

SPEECH ACT performed by A:

LOCUTIONARY ACT: Production and pronunciation of the above sentence (in speech, writing or sign), given knowledge of the vocabulary and grammar of English, and the referent of *you*.⁷

ILLOCUTIONARY ACT: Protest against B doing sth., commanding B not to do sth.⁸

PERLOCUTIONARY ACT: Stopping B, Annoying B, etc.⁹

Austin (1962), p. 102.

⁷Austin would paraphrase this as “He said to me ...”.

⁸Austin would paraphrase this as “He protested against my doing it”.

⁹Austin would paraphrase this as “He stopped me, annoyed me, etc. ...”.

¹²Austin would paraphrase this as “He persuaded me to ...”.

Section 5: Direct and Indirect Speech Acts

Sentences and Speech Acts

Remember from above that we might draw a distinction (though it is not always adhered to in the literature) between *types of sentences* on one hand, and *types of speech acts* – according to their different *illocutionary forces* – on the other hand.

Direct Speech Act

We have a **direct speech act** if the type of sentence (grammatical form) **matches the type of illocutionary force** (according to general expectation).

Declarative ·————→· *Statement*

Interrogative ·————→· *Question*

Imperative ·————→· *Command*

Examples: Direct Speech Acts

- (33) It is raining. (Declarative)
ILLOCUTIONARY FORCE: Making a statement.
- (34) Is it raining? (Interrogative)
ILLOCUTIONARY FORCE: Asking a question (request for information).
- (35) Make it rain! (Imperative)
ILLOCUTIONARY FORCE: Giving a command.

Indirect Speech Act

“We might define an **indirect speech act** (following Searle 1975) as an utterance in which one illocutionary act (the **primary act**) is intentionally performed by means of the performance of another act (the **literal act**). In other words, it is an utterance whose **form does not reflect the intended illocutionary force.**”

Kroeger (2019), p. 186.

Examples: Indirect Speech Acts

- (36) I want you to leave now. (Declarative)
ILLOCUTIONARY FORCE: Giving a command.
- (37) I would like to have a cup of tea, please. (Declarative)
ILLOCUTIONARY FORCE: Request for tea.
- (38) Can you pass me the salt? (Interrogative)
ILLOCUTIONARY FORCE: Command (rather than request for information).
- (39) Isn't this a beautiful day? (Interrogative)
ILLOCUTIONARY FORCE: Statement (i.e. rhetorical question, which is not necessarily a request for information).
- (40) Tell me the way to the train station! (Imperative)
ILLOCUTIONARY FORCE: Request for Information/Question.
- (41) Look how blue the sky is! (Imperative)
ILLOCUTIONARY FORCE: Statement.¹³

Indirect Speech Acts and Conversational Implicatures

“Having recognized [...] an **indirect speech act**, how does the addressee figure out what the intended illocutionary force is? Searle’s solution is essentially the Gricean method of **calculating implicatures**, enriched by an understanding of the Felicity Conditions for the intended speech act.”

Kroeger (2019), p. 189.

(42) A to B: Can you pass me the salt?

INFERENCE by B: The question is irrelevant to our conversation (Maxim of Relevance); There is a politeness convention to ask for sth. rather than to command to hand it over (Conventionality Condition). Hence, the speaker actually commands me to pass the salt.

Summary

Summary

- ▶ **Performatives** are another type of declarative sentence (besides constatives) accounting for the fact that we can **perform actions**, i.e. ‘do things with words’, rather than just describing the world.
- ▶ Besides different **types of sentences** there also exist different **types of speech acts** according to the illocutionary force that a sentence has.
- ▶ Furthermore, speech acts consist of three parts: **locutionary**, **illocutionary**, and **perlocutionary** acts.
- ▶ In the case of **direct speech acts**, the **grammatical form** matches with the **illocutionary force** of an utterance, while in the case of **indirect speech acts**, there is a mismatch between the two.
